Complete the program so the output is the same as below.

```
import java.util.Scanner;
// User picks starting and ending value
class LoopStartEnd
{
  public static void main (String[] args )
  {
    Scanner scan = new Scanner( System.in );
    int loopStart, loopEnd;

    System.out.print( "Enter the Start value: " );
    loopStart = scan.nextInt();

    System.out.print( "Enter the End value: " );
    loopEnd = scan.nextInt();

    for ( [redacted] ){

      System.out.println( "Number : " + loopEnd );
      loopEnd = loopEnd - 2;
    }
        }

}
```

Output:

Number : 12
Number : 10
Number : 8
Number : 6
Number : 4
