

Chapter 5 Exercises

1. Create an app that displays a text dialog prompting the user to enter their name and age and then immediately displays the users 'info in a message dialog.
2. Create an app that uses a while loop that iterates five times. In each iteration, the app should display a random number in a message dialog.
3. Create an app that uses a for each loop to calculate the sum of the numbers 10, 20, 30, 40, and so forth, up to 500.
