

## Exam Project

### Daily Special

Write an application that allows a restaurant manager to enter the seven daily specials and store the information into a TinyDB using the day of the week as the tag and the special entered on the screen as the value. Provide a search underneath the entry portion that will allow the user to enter the day of the week in a textbox, click a button, and see the special for that day.

Screen1

### Daily Special

Monday	<input type="text"/>
Tuesday	<input type="text"/>
Wednesday	<input type="text"/>
Thursday	<input type="text"/>
Friday	<input type="text"/>
Saturday	<input type="text"/>
Sunday	<input type="text"/>
