

Project 2-1:

Application title: Youth Hostel App

Purpose: In a youth hostel reservations app, a hostel is selected and an address and other information are displayed.

Algorithms: The opening screen displays the name of a hostel, an image, and a Button control (See sample). Research a real name of a hostel and address and cost range to display in your own customized app.

When the user selects a hostel, an address and a cost range are displayed in a second screen
