

## Project 6-2:

**Application title:** Celtic Songs App

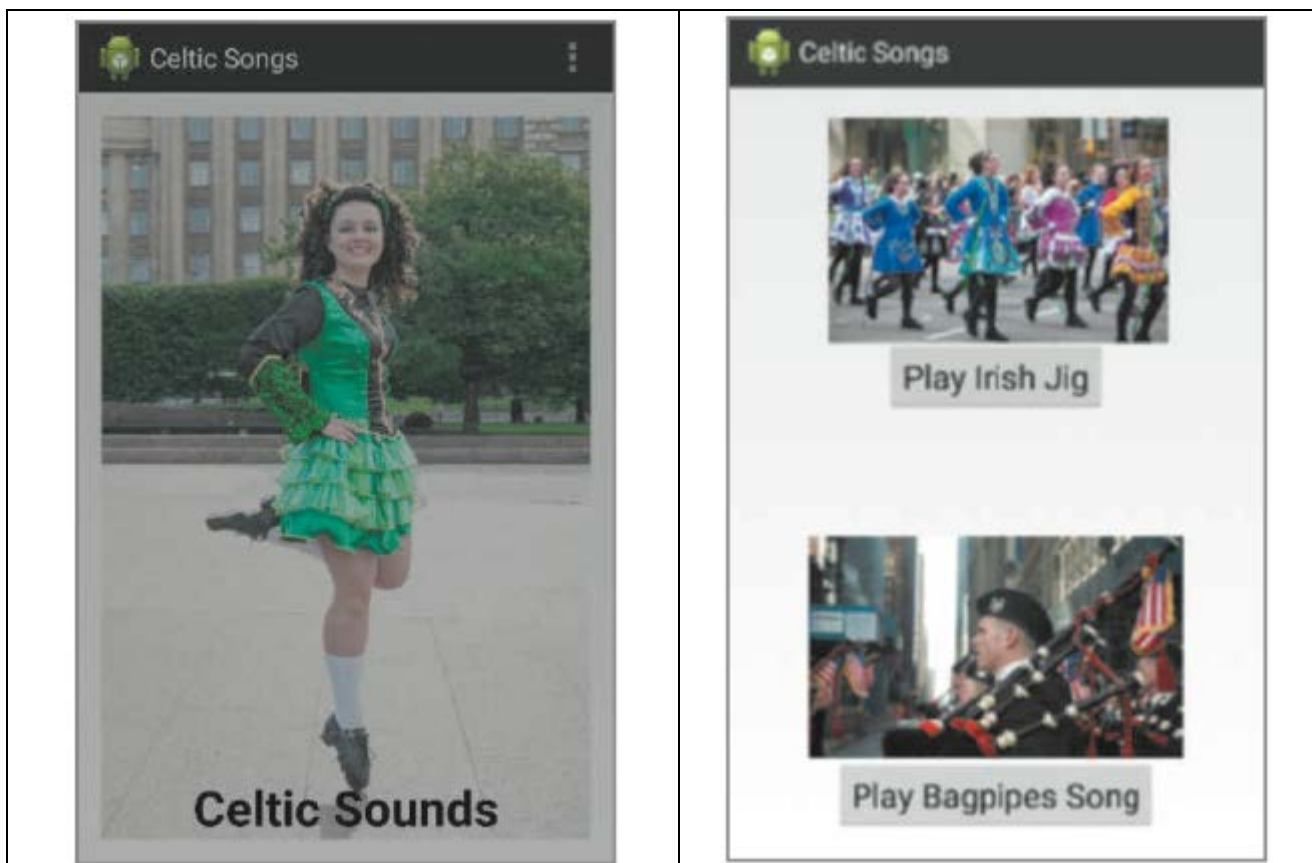

**Purpose:** A music app compares the different types of Celtic music.

### Algorithms:

1. A splash screen opens and displays the celtic.png image with the title “Celtic Sounds” for four seconds.
2. Two types of Celtic music are available in this app. An Irish jig named jig.mp3 can be played while displaying an image of Irish dancers (jig.png). A second selection of bagpipe music plays bagpipes.mp3 while displaying an image of a man playing bagpipes

### Conditions:

1. The pictures of the two types of music (jig and bagpipe) and the two music files are provided to you.
2. The music should be played and paused by a button control.
3. When a song is playing, the other button should not be displayed.

## Strings.xml

```
<resources>  
  <string name="app_name"> Celtic Songs </string>  
  
</resources>
```

## **Steps to a successful App.**

1. Don't forget to create your Keys and Values in the Strings.xml file
2. Don't forget to link the Keys and Values to their actual Components in the Properties
3. All the design happens in the activity\_main.xml
4. All the code for the Events (i.e. Buttons) is done on the MainActivity.java file
5. All pictures and media go inside the Drawable folder
6. To Import classes use Alt-Enter
7. Save and test your work frequently
8. Sync your work frequently
