

## HTML Website Builder Practice using Coffeecup desktop program

You will practice creating basic HTML pages. Your pages should have the following:

1. Two pages
2. At least two paragraphs
3. At least two images per page
4. Text with different color
5. Text with different size
6. Text with different formatting
7. Hyperlink from one page to another
8. A page Title.

When you are finish, upload your webpage using the website CoffeeCup and send me the URL via Seesaw using the Link Option.

You will be graded based on content, relevance and appearance.
