

## Java Interactive Quiz Exercise Part 2

Open the interactive quiz program and save it as a new class "**InteractiveQuiz2**". Next, add one more question (True/False). You must keep track of how many they get wrong, and print out a "score" at the end.

Q2) ("True or False, the capital of France is Paris ");

If the answer is correct, Print: That's right! Your score is **X** points now.

If the answer is incorrect, Print: Sorry, your answer is wrong. Your score is **X** points.

At the end, print the following statement: "Overall, your score is **X** out of **X** points Thanks for playing!"
