

Menu Database

Create a new Java Project called **Menu Database**. Create a JFrame called **OrderForm**. Use the absolute Layout and create the following form.

The screenshot shows a Java Swing window titled "Pizza Order Form". The window contains the following fields and controls:

- Order ID: Text input field
- First Name: Text input field
- Last Name: Text input field
- Address: Text input field
- City: Text input field
- State: Text input field
- Zip: Text input field
- Phone: Text input field
- Pizza: Combo box with "Choose a Pizza" selected
- Crust: Radio buttons for "Thin", "Medium", and "Thick"
- Sides: Combo box with "Choose a Side" selected
- Drinks: Combo box with "Choose a Drink" selected
- Select an Option: Combo box with "Delivery" selected
- Total: Text input field
- Buttons: "Place Order", "Cancel Order", and "Exit"

Red annotations highlight specific components:

- A red box labeled "ButtonGroup" points to the crust radio buttons.
- A red box labeled "Combo Boxes" points to the "Choose a Pizza", "Choose a Side", "Choose a Drink", and "Delivery" dropdown menus.

Combo Box Options:

- "Delivery", "Carry Out", "Dine In"
- **Choose a Pizza**, "Vegetarian", "Meat Lovers", "Hawaiian", "Chicken", "Cheese"
- **Choose a Side**, "Salad", "Bread Sticks", "Wings"
- **Choose a Drink**, "Water", "Soda", "Juice"
