

Multi Windows Meal Order Part 2

- Move the JPanel panelSandwich and JPanel panelSides after the JPanel panelMenu
- Set the following under the Panels:

```
final JPanel panelMenu = new JPanel();  
frame.getContentPane().add(panelMenu, "name_1136360012417980");  
panelMenu.setLayout(null);  
panelMenu.setVisible(true);
```

```
final JPanel panelSandwich = new JPanel();  
frame.getContentPane().add(panelSandwich, "name_1136678139984852");  
panelSandwich.setLayout(null);  
panelSandwich.setVisible(false);
```

```
final JPanel panelSides = new JPanel();  
frame.getContentPane().add(panelSides, "name_1136681244425551");  
panelSides.setLayout(null);  
panelSides.setVisible(false);
```

- Double click on the Sandwiches Button

```
JButton sandwichButton = new JButton("Sandwiches");  
sandwichButton.addActionListener(new ActionListener() {  
    public void actionPerformed(ActionEvent arg0) {  
        panelSandwich.setVisible(true);  
        panelMenu.setVisible(false);  
    }  
});
```

- Double click on the Sides Button

```
JButton sidesButton = new JButton("Sides and Drinks");  
sidesButton.addActionListener(new ActionListener() {  
    public void actionPerformed(ActionEvent e) {  
        panelSides.setVisible(true);  
        panelMenu.setVisible(false);  
    }  
});
```

- Set the three JPanel to final ex: **final** JPanel panelMenu
