

Multi Windows Meal Order Part 3

- Double click Order Button for the Sandwiches Panel and change your code to look like this:

```
sandwichOrder.addActionListener(new ActionListener() {  
    public void actionPerformed(ActionEvent e) {  
        String s = new String();  
  
        if (burgerCheckBox.isSelected()){  
            s = "Burger, ";  
        }  
        if (chickenCheckBox.isSelected()){  
            s = s + "Chicken, ";  
        }  
        if (veggieCheckBox.isSelected()){  
            s = s + "Veggie, ";  
        }  
        if (seafoodCheckBox.isSelected()){  
            s = s + "Seafood, ";  
        }  
  
        burgerLabel.setText(s);  
        panelSandwich.setVisible(false);  
        panelMenu.setVisible(true);  
    }  
});
```

- Double click Order Button for the Sides Panel and change your code to look like this:

```
sidesOrder.addActionListener(new ActionListener() {  
    public void actionPerformed(ActionEvent e) {  
        String s = new String();  
  
        if (friesCheckBox.isSelected()){  
            s = s + "Fries, ";  
        }  
        if (sodaCheckBox.isSelected()){  
            s = "Soda, ";  
        }  
        if (shakeCheckBox.isSelected()){  
            s = s + "Shake, ";  
        }  
        if (saladCheckBox.isSelected()){  
            s = s + "Salad, ";  
        }  
  
        textSide.setText(s);  
        panelSides.setVisible(false);  
        panelMenu.setVisible(true);  
    }  
});
```
