

Registration Form: User 1

Next Button Code

```
JButton btnNext = new JButton("Next");
btnNext.addActionListener(new ActionListener() {
    public void actionPerformed(ActionEvent arg0) {

        user1.setVisible(false);
        panelForm.setVisible(false);
        user2.setVisible(true);

        textFirstR.setText(textFirst.getText());
        textLastR.setText(textLast.getText());

        textDateR.setText(comboBoxMonth.getSelectedItem()+" "+spinnerDay.getValue()+"
"+comboBoxYear.getSelectedItem());

        textEmailR.setText(textEmail.getText());
        textStreetNameR.setText(textStreetName.getText());
        textStreetNumR.setText(textStreetNumber.getText());
        textCityR.setText(textCity.getText());
        textStateR.setText((String) comboBoxState.getSelectedItem());
        textZipR.setText(textZip.getText());

        char amp = '@';
        String email = textEmail.getText();
        int result;
        result = email.indexOf(amp);
        System.out.println(result);

        if(result<0){
            JOptionPane.showMessageDialog(null, "Invaild Email",
            Error",JOptionPane.ERROR_MESSAGE);

            user1.setVisible(true);
            panelForm.setVisible(false);
        }

        //Code to Reset the combo boxes and spinner
        spinnerDay.setValue(1);
        comboBoxMonth.setSelectedIndex(0);
        comboBoxYear.setSelectedIndex(0);
        comboBoxState.setSelectedIndex(0);
```

You must reset the other fields too.
