

```
public class ProductTester1 {  
  
    public static void main(String[] args) {  
  
        //create two objects using the default constructor  
        ProductPart1 p1 = new ProductPart1();  
        ProductPart1 p2 = new ProductPart1();  
  
        //create four objects using values for the arguments  
        //this will use the overloaded constructor  
        ProductPart1 p3 = new ProductPart1(1234, "Pencil", 500, .25);  
        ProductPart1 p4 = new ProductPart1(1235, "Pen", 250, .75);  
        ProductPart1 p5 = new ProductPart1(1236, "Marker", 100, 1.00);  
        ProductPart1 p6 = new ProductPart1(1237, "Scissors", 10, 3.00);  
  
        //display the descripton of each object as outlined in the toString() method  
        System.out.println(p1);  
        System.out.println(p2);  
        System.out.println(p3);  
        System.out.println(p4);  
        System.out.println(p5);  
        System.out.println(p6);  
    }  
}
```
