

## Practice 2 — Array Sum

Copy and examine the following program:

```
class ArraySumPractice
{
    public static void main ( String[] args )
    {
        int[] val = {0, 1, 2, 3};

        int sum = val[ ?]+

        System.out.println( "Sum of all numbers = " + sum );

    }
}
```

**Complete the assignment statement (`int sum =`) so that it computes the sum of all the numbers in the array.**
