

The following are two separate classes. Use the correct class name for each file. The class name is highlighted in blue

Exercise 1: String Practice

```
public class StringVariable {  
  
    public static void main(String[] args) {  
        String first_name = "Insert your first name here";  
        String last_name = "Insert your last name here";  
        System.out.println("Your full name is " + [REDACTED] + " " + [REDACTED]);  
    }  
}
```

Exercise 2: Char Practice

```
public class CharVariable {  
  
    public static void main(String[] args) {  
        char [REDACTED] = 'W';  
        char [REDACTED] = 'S';  
        char grade = 'A';  
        System.out.println( first_initial + " " + last_initial + " Your current grade is " + [REDACTED]);  
    }  
}
```
