

While Loop Practice

```
// Example of a while loop
public class WhileLoopExample
{
    public static void main (String[] args )
    {
        // start count at one
        int count = 2;

        // loop while count is <= 3
        while ( count <= 500 )
        {
            System.out.println( "count is:" + count );

            // add one to count
            count = count + 3;
        }
        System.out.println( "Done with the loop" );
    }
}
```
